

The GTS Dashboard includes functionality that allows users to change their passwords if forgotten or to establish a password on first use (the dashboard account requires an associated e-mail address to perform this).

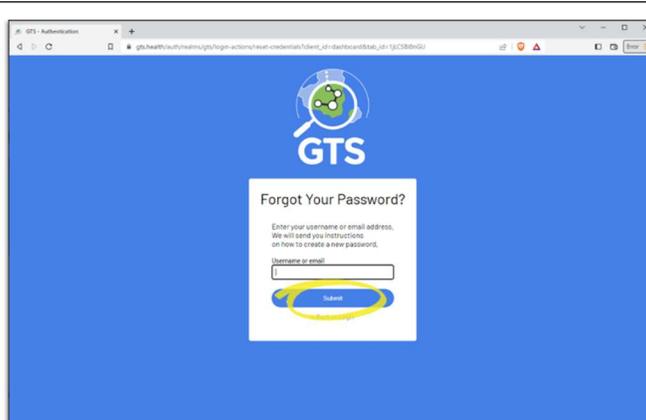

- 1) Browse to www.gts.health and click on “Connect to GTS”

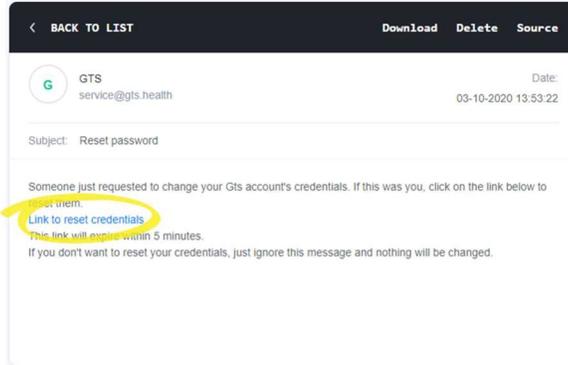

- 2) To change your Password, click on “Forgot Password”

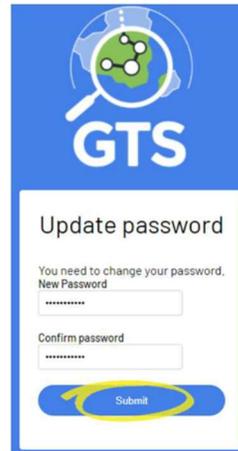

- 3) Enter your username or email address where indicated and click on the “Submit” button.

- 4) Check your email, there should be a mail from **service@gts.health** with the subject "Reset Password". Open this mail and click on the "Link to reset credentials".

- 5) Enter the new password (the password must be at least 8 characters long and contain both uppercase and lowercase letters) then click on the "Submit".

You should now be able to login to the GTS dashboard with your account and new Password.
